To,
The Child Vikas Foundation
Bengaluru,

Dated: 04/05/2024

Subject: Information regarding patient: Baby of Vanitha (4877268)

We have a young patient named Baby of Vanitha, a 11-month-old-baby-boy under the treatment of paediatrics. The baby is diagnosed with primary immunodeficiency and has undergone multiple admissions in our hospital. Presently, according to the treating team, child requires regular IVIG injection monthly - basis which would cost them around Rs. 15,000/- to Rs. 20,000/- (approximately) including hospitalization.

The family hails from Krishnagiri, Tamil Nadu and they consists of 6 members. The child's father is the primary source of income and he used to work in a factory, but recently lost his job (due to taking leaves because of the continuous hospitalization of the baby). The child's mother is a homemaker and presently they are exhausted of their resources for further treatment of the baby. The family has spent more than 6 lakhs for during multiple admission which included NICU and PICU care.

Hence, we request your help towards the monthly treatment expense of the child.

Thanking you in advance,

Yours Sincerely,

Ms. Jisha Sara Jose
Medico Social Worker
