**Subject: Information regarding patient baby of Meena Twins**

This is regarding the case of a family (Baby of Meena Twins) from Hosur, Tamil Nadu, who delivered preterm twin babies on 10<sup>th</sup> of June, 2025 at St. John's Medical College Hospital, Bangalore. The delivery was LSCS, conducted under the care of our Obstetrics Department and this pregnancy was a result of an IVF conception. The babies were born at 26 weeks gestation.

The babies are Extreme Preterm and have a birth weight of Twin 1 - 660g and Twin 2- 790g respectively. Following the delivery, the family has expressed their unwillingness to take responsibility for the twin babies, citing financial constraints and concerns about the infant's survival prognosis. Despite multiple counselling sessions, the family remains firm in their decision to relinquish care. The hospital had also proposed to the option of transferring the infants to a government hospital, which the family refused to accept.

As of now, St John's Medical College Hospital is continuing the treatment for the baby, and we are referring the case to The Child Welfare Committee for further interventions and rehabilitation. Presently, the babies are doing well and has gained weight of 1.84kg (T1) and 2.24kg (T2) respectively.

To make sure that the babies receive the essential medical treatment, your financial help is essential. Any amount will have a big impact on their care and wellbeing. I've attached the necessary documents below.

**UHID: Twin 1 – 5281006 and Twin 2- 5281009**

We respectfully ask that you take the patient's care into consideration and truly appreciate your kindness and generosity.

Thanking you,

Yours Sincerely,

Ms. Mili Marriam Mathew  
Medico Social Worker
