

LABORATORY REPORT

NAME : MASTER RAJGURU GORAKH
KAMBALE 00580741
AGE : 3Y 0M 7D
GENDER : Male
OP/IP/DG # :
REFERRED BY : DR SANDHYA VADDADI
RAINBOW CHILDRENS MEDICARE LTD
BANJARA HILLS
LAB MR# : AAMP01640285
VISIT NO : VAMP26342936
COLLECTED ON : 10-09-2026 13:03
RECEIVED ON : 10-09-2026 13:06
APPROVED ON : 10-09-2026 16:12
REPORT STATUS : Partial Report

Hemonc Panel - Acute Leukemia Extended 4

HAEMATOLOGY

Flowcytometry Panel - Acute Leukemia Comprehensive Characterization (Bone marrow aspirate)

Flow cytometry No: FC26/1673

Final Impression: Morphology and immunophenotypic analysis is suggestive of B-cell Acute Lymphoblastic Leukemia (B-ALL).

Specimen:

Peripheral blood smears-4 unstained labelled.

Bone marrow aspirate EDTA-1, Heparin-1 vacutainers, smears-10, imprint smears-7 unstained labelled.

Flow cytometric immunophenotyping

Specimen: Bone marrow aspirate

Panel: Acute Leukemia

Gating Strategy(ies): SSC/FSC and CD45/SSC

Gated Population(s): Blasts

On flow cytometric immunophenotyping, an abnormal population was identified in progenitor (dim to negative CD45 Vs low SSC) blasts region, constituting ~80% of all viable events.

It showed following immunophenotype:

Gated population	Expression	Intensity
CD45	Positive	Dim to negative

Generated On 10-Sep-2026 16:53:07

This is an electronically authenticated laboratory report.

Hemonc Panel - Acute Leukemia Extended 4

Non-lineage specific antigens		
CD34	Positive	Variable
HLA-DR	Positive	Variable
CD38	Negative	
B lymphocytic antigens		
CD19	Positive	Moderate
CD10	Positive	Bright
CD20	Negative	
CD22	Positive	Moderate
CD123	Negative	
T Lymphocytic antigens		
CD2	Negative	
CD3 (Cytoplasmic)	Negative	
CD5	Negative	
CD7	Negative	
CD56	Negative	
Myeloid antigens		
CD11c	Negative	
CD13	Negative	
CD14	Negative	
CD15	Negative	
CD33	Negative	
CD117	Negative	
CD64	Negative	
Myeloperoxidase (Cytoplasmic)	Negative	

Final Impression: Morphology and immunophenotypic analysis is suggestive of B-cell Acute Lymphoblastic Leukemia (B-ALL).

Disclaimer:

1. All results released pertain to the specimen as received by the lab for testing and under the assumption that the patient indicated or identified on the bill/test requisition form is the owner of the specimen.
2. Clinical details and consent forms, especially in Genetic testing, histopathology, as well as wherever applicable, are mandatory to be accompanied with the test requisition form. The non-availability of such information may lead to delay in reporting as well as misinterpretation of test results. The lab will not be responsible for any such delays or misinterpretations thereof.
3. Test results are dependent on the quality of the sample received by the lab. In case the samples are preprocessed elsewhere (e.g., paraffin blocks), results may be compromised.
4. Tests are performed as per the schedule given in the test listing and in any unforeseen circumstances, report delivery may be affected.
5. Test results may show inter-laboratory as well as intra-laboratory variations as per the acceptable norms.
6. Genetic reports as well as reports of other tests should be correlated with clinical details and other available test reports by a qualified medical practitioner. Genetic counselling is advised in genetic test reports by a qualified genetic counsellor, medical practitioner or both.
7. Samples will be discarded post processing after a specified period as per the laboratory's retention policy. Kindly get in touch with the lab for more information.
8. If accidental damage, loss, or destruction of the specimen is not attributable to any direct or negligent act or omission on the part of Ampath Labs or its employees, Ampath shall in no event be liable. Ampath lab's liability for a lack of services, or other mistakes and omissions, shall be restricted to the amount of the patient's payment for the pertinent laboratory services.
