From.

Dr. Ranjini Srinivasan

Associate Professor.

Department of Pediatrics

St. John's Medical College Hospital

To whomsoever it may concern

Child Siddharth, 9 month old infant, has been admitted (4962459) in St. John's hospital with diagnosis of Achondroplasia with malnutrition with persistent pneumonia. Child was admitted on 24/09/2023 and initially required admission to the intensive care unit for almost 2 weeks, after which he was shifted to the Pediatric ITU, for further management. At present he continues to require oxygen, antibiotics and HFNC mode of oxygen support. So far, they have incurred a bill of 3.5 lakhs and the family comes from a poor financial background. Considering his current condition it is anticipated that he will need another 2 weeks of hospital admission minimum, and the estimated bill is likely to be 5-6 lakhs. I request you to kindly provide your assistance, in helping this family financially, to aid in the recovery of the child.
