

APPEAL FROM PARENTS TO OUR DONORS

To a family, kids are like blessing for entire family. Vijay lakshmi(*Mother*), felt so happy when my baby “*Ratnam Pavan Avinas*” was born healthy. However, this happiness did not last long. After a few months, Pavan started with high grade fever and bit of Blood stools. He would get a frequent health issues and was getting body pains.

I got really worried and decided to take him immediately to a nearby hospital Dr.Vamshi Krishna Pediatric specialist at Rajahmundry . Dr. Vamshi, did some test and informed us to wait for a week, like that, Doctors did several test and they informed us that, Pavan seems to ill. We would recommend you to get some more tests done from a specialty hospital at Kakinada Govt. Hospital”. They did some more test and referred to Rainbow Children’s Hospital at Hyderabad.

WE were so worried and immediately rushed him to the Rainbow Children’s Hospital. The doctors performed some more tests. My baby’s health was deteriorating and his body was turning pale. After performing all the test, Doctor said Pavan was diagnosed with T - CELL ACUTE LYMPHOBLASTIC LEUKEMIA (ALL - Blood Cancer).

Doctor’s said , “Your son needs urgent chemotherapy medication. We have checked the test and reports and we would recommend you to start the treatment immediately with no further delay,” while checking the Pusam’s reports.

We were so panic, when my son crying made me feel so helpless. Looking at his body being pierced with needles and tubes, that broke my heart. We were shocked hearing about the diagnosis. But we did not have any time to waste. We kept some hope on Doctors and admitted to the hospital and his treatment began. Meanwhile we started struggling to find ways to fund his Blood Cancer treatment.

My son Pavan was in a constant pain. He cries all day and I want to hold him in my arms and soothe him. He is just 9 years old and he is suffering so much, and I want to save him and reduce his pain, but I just can't. We have spent all our savings and borrowed money from our relatives and friends too. My baby is everything to us, saving him is our primary priority.

Pavan's father, works as a Coconut seller at street side (Hyderabad), he is a daily wage earner, hardly manages to make ends meet. He is the sole breadwinner and we cannot afford the treatment of our child. Our son is fighting daily to live another day. I pray God none of the parents ever have the bad fortune to witness their own son suffering from such a big "DISEASE".

My son is going through hard treatment, for that we arranged the money from various sources. We have already spent all we could afford to save him. We desperately need your support to keep going. Please donate today, to make sure my son lives. Every bit PENNY matters a lot.
